

BATTERY-POWERED DUSTER

Professional battery-powered duster

FEATURES

Battery-powered duster used for dispensing powdered products.

Equipped with a 6 kg tank, it can handle a considerable amount of product. Its weight distribution is optimal, ensuring comfortable and balanced use.

The centrifugal impeller with vertical powder fall ensures uniform and precise distribution, while the technical base is separate from the machine body, increasing stability and ease of use. The battery charging system is designed for quick and easy charging, and the 12V rechargeable battery provides constant power for extended use.

It features a mechanical mixing system and a 5-position lever-operated powder regulator, allowing you to adapt distribution to your specific needs.

USE TIPS

If possible, completely empty the powder tank by dispensing, to avoid having to empty it manually. For this purpose, it is recommended to estimate the amount of powder to be poured into the tank before starting work.

Before unscrewing and removing the tank lid, make sure the operating lever is in the rest position and the main switch is turned off.

TECHNICAL SPECIFICATIONS

- Optimal weight distribution
- Centrifugal impeller with vertical dust fall
- Technical base separated from the machine body
- Battery charger included 12V 1.8 Ah
- Mechanical mixing system
- Maximum powder flow rate 0.3 kg/min
- Extension tube
- Anatomical HD Polyethylene frame
- Adjustable padded shoulder straps
- 12V 31.2W electric motor
- 12V DC 8 Ah 96 Watt rechargeable lithium battery
- 5-position lever-operated dust regulator
- Maximum air flow rate 28 l/s

TECHNICAL FEATURES

MATERIAL

Polyethylene

CAPACITY

6 kg

EMPTY WEIGHT

6,6 kg
