

CITROFOLIS SPRAY

Ready-to-use repellent based on Citriodiol®

MEDICAL-SURGICAL DEVICE:
Ministry of Health Reg. No. 21701

Revision 0 - July 2026

COMPOSITION

100 g of product contains:

Eucalyptus citriodora oil, hydrated, cyclized (CAS 1245629-80-4)	17,5 g
Coformulants q.s. per	100 g

DESCRIPTION

CITROFOLIS SPRAY is an insect repellent based on Citriodiol®, used with special automatic electronic diffusers. A useful remedy against the tiger mosquito (*Aedes albopictus*), it creates an effective protective barrier against Culicidae.

CITRIODIOL® CHARACTERISTICS

Citriodiol® is a plant-based active ingredient with a repellent effect, obtained from the eucalyptus citriodora plant (*Corymbia citriodora*) through an extraction and distillation process, with an efficacy comparable to synthetic active substances, such as pyrethroids.

INTENDED USE

CITROFOLIS SPRAY is suitable for domestic, civil, and industrial use. It can be used indoors in any building, such as: holiday villages, campsites, homes, restrooms, farms, animal shelters, cellars, attics, garages, meeting rooms, and private and public buildings (hospitals, hotels, schools, shops, barracks, cinemas, etc.).

CITROFOLIS SPRAY can also be used in domestic buildings, kitchens, bars, restaurants, company canteens, and food processing plants (dairies, cheese factories, butcher shops, warehouses, tobacconists, etc.).

DOSAGE AND DIRECTIONS FOR USE

Insert the can into the automatic dispenser and activate it, setting a spray every 30 minutes, following the dispenser's instructions. For best results, position the dispenser at least 2 m from the floor and 30 cm from the ceiling.

CYTROFOLIS SPRAY is released at regular intervals, ensuring constant protection from target insects, requiring approximately three sprays to reach full effectiveness. A 250ml canister left on 24 hours a day, at 30-minute intervals, lasts up to 8 weeks. One canister can cover a room of approximately 25 m².

TARGET PEST

FLYING INSECTS

Tiger mosquito (*Aedes albopictus*)

Hazard Statements (H):

- H223: Flammable aerosol
- H229: Pressurized container: may explode if heated
- H319: Causes serious eye irritation
- H336: May cause drowsiness or dizziness.

WARNINGS

Read the label carefully before use.

Read the product information contained in the relevant safety data sheet.
